

FORMWORK & CONCRETE ACCESSORIES

TIMBER FILLET MOULD

Triangular timber fillet creates a neat chamfered edge on formed corners on concrete structures such as columns, slabs and on top of finished upstands/hobs. It is also used to create drip grooves in exposed slab soffits.

Description	Code Number
Fillet Mould Timber 2900mm	FT29

PLASTIC FILLET MOULD

Triangular plastic fillet has sufficient flex to follow curves in formwork. Made from solid plastic, it is recoverable and re-usable. The fillet creates a neat chamfered edge on formed concrete structures and halts grout loss whilst leaving an off-form smooth finish. It is also used to create drip grooves in exposed slab soffits. It is easy to fix and strip

Description	Code Number
Fillet Mould Plastic 2.9m	FP29
Fillet Mould Plastic 2.9m 12mm	FP2912
Fillet Mould Plastic 4.0m	FP4
Fillet Mould Plastic 4.0m Winged	FP4W

FILLET CUTTERS

Hand held fillet cutters with heavy duty construction for durability . They are ideal for cutting formwork timber fillets, PVC fillets and PVC conduits and are designed for a fast straight cut or angled mitre cutting of fillet.

Description	Code Number
Plastic Fillet Shears	PFC

SCREEDMASTER CHAIR

The Screedmaster chair is an adjustable, multipurpose plastic chair used to hold suspended formwork for set downs, rebates and steps on concrete slabs. The Screedmaster chair is designed to hold forms on metal decks and/or conventional formwork decks. The base can be fastened down using staples, nails or screws. It has an adjustable threaded height range of 125mm - 245mm and is lightweight yet sturdy and can be left in the concrete.

Description	Code Number
Screedmaster	SCREEDM

FORMPLY REPAIR PLUGS

Formply plastic repair plugs insert into plywood to plug unwanted drill holes and prevent concrete slurry slipping through. This makes the sheet reusable and leaves the concrete flat.

Description	Code Number
Formply Repair Plug 14mm	FRP14
Formply Repair Plug 17mm	FRP17
Formply Repair Plug 21mm	FRP21
Formply Repair Plug 24mm	FRP24
